#8 – GIT & GITHUB

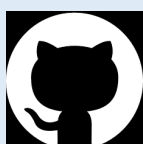

GIT

GIT is a tool in your local device that helps you save and manage your code, work with others, keep track of changes , and undo mistake

GIT is a popular version control system

GIT was created by Linus Torvalds in 2005, and has been maintained by Junio Hamano since then

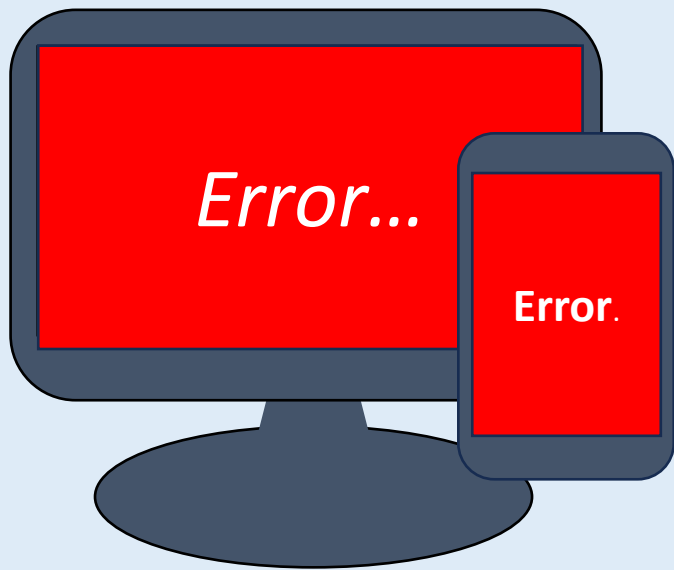

GITHUB

GITHUB is a website that works like a GIT

GITHUB is a provider or service that stores and manages source code All of developers

WITHOUT GIT & GITHUB

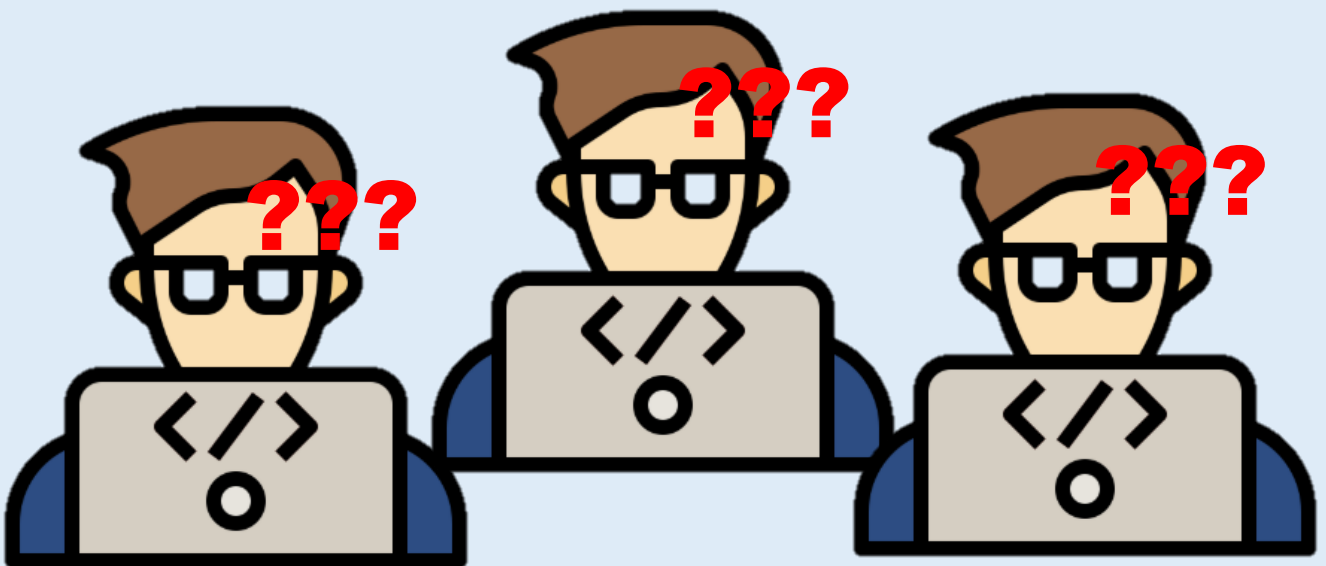

Who does overwrite line of code
number 2 ???

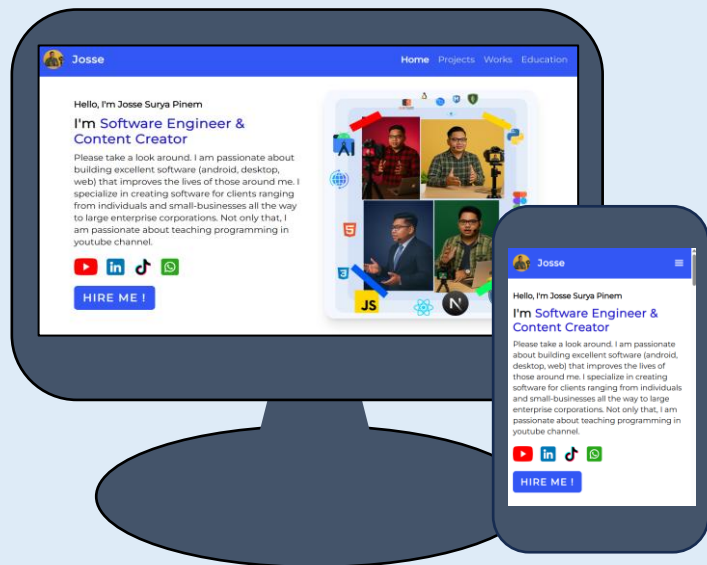

Where should we put
this code securely
and you can access
easily ???

Who does create
feature-c ???

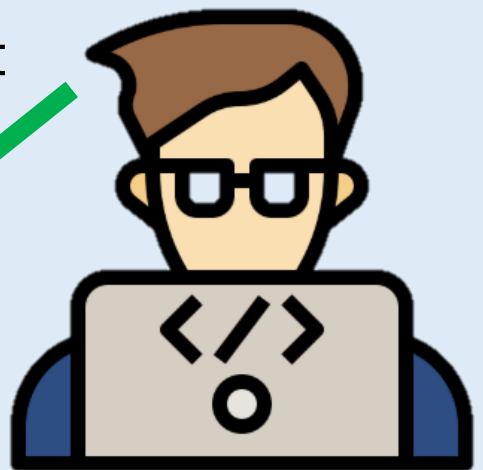

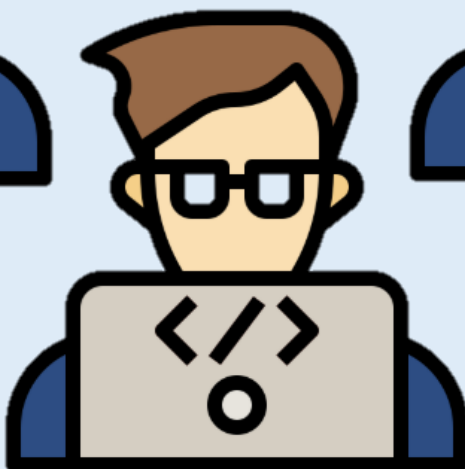

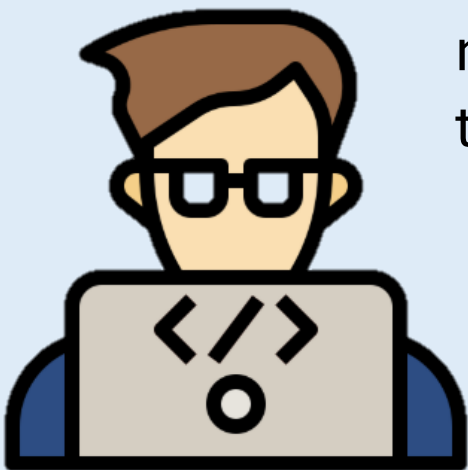

WITH GIT & GITHUB

To see our history
Run command
git log --all ✓

Put our code in
cloud github ✓

Easy
management
team work ✓

git log --all

commit
ba04ef0dc1db872164369132770ce70875f53913
(HEAD -> main, origin/main)

Merge: 60667a4 3ee3984

Author: josserich <pinemjosse@gmail.com>

Date: Fri May 1 13:29:36 2026 +0700

solve merge conflicts

commit
3ee39840aad56e7ddae4a4611d7d54bd33e1
(origin/feature-c)

Author: ieltsjoe-dev <ieltsjoe@gmail.com>

Date: Sun Apr 26 20:02:44 2026 +0700

adding feature-c

commit
60667a4d31abe7238f4d281bfdd02679a0dba228
(origin/feature-b)

Author: codewithjoees

<codewithjoe@gmail.com>

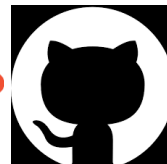

Date: Sun Apr 26 19:58:32 2026 +0700

adding feature-b

commit
3ad3096a65656c180e3aebc03ccc364588d68893
Author: josserich <pinemjosse@gmail.com>

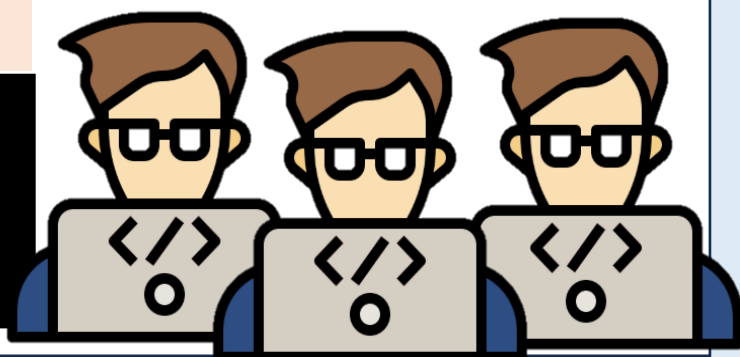

Date: Sun Apr 26 19:53:27 2026 +0700

first commit

GIT LOG

```
C:\desktop >  
git log --all
```

GIT AREA

Remote / Internet Repository

GIT PUSH

GIT FETCH

GIT CLONE / PULL

Local Repository

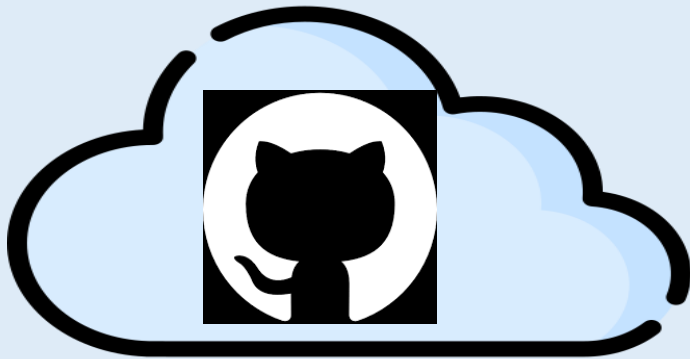

GIT COMMIT

GIT MERGE

Staging Area

GIT ADD

Working Directory

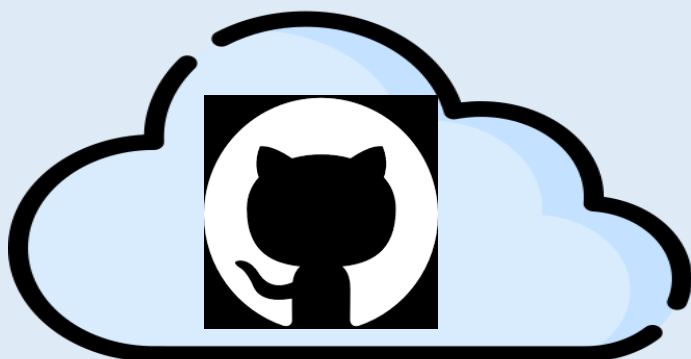

CASE - 1

Upload source code to
cloud github

C:\Desktop >

```
git init  
git add .  
git commit -m  
"<message>"  
git remote add origin  
<link_github>  
git push
```

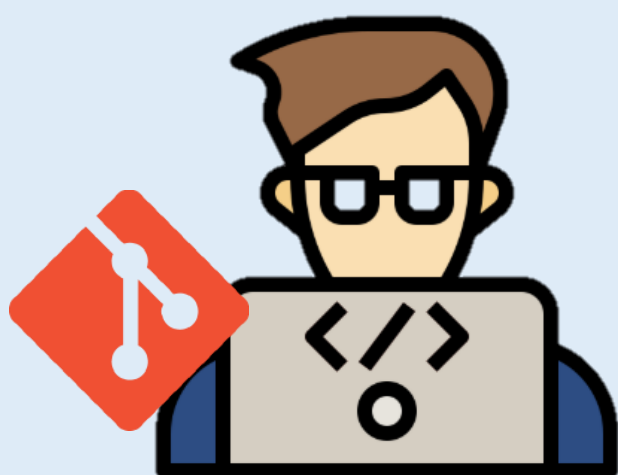

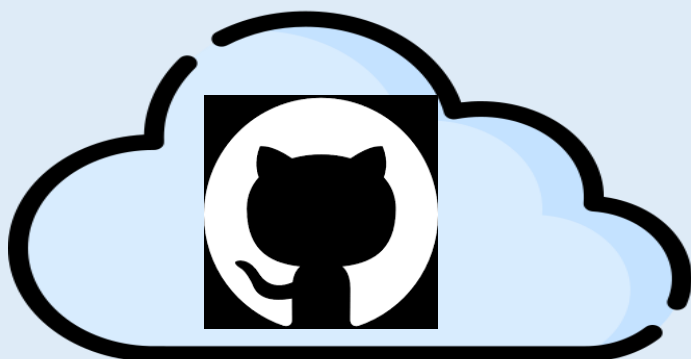

CASE - 2

download source code
from cloud github to
local system for the
first time

C:\Desktop >

```
git clone <link_github>
```

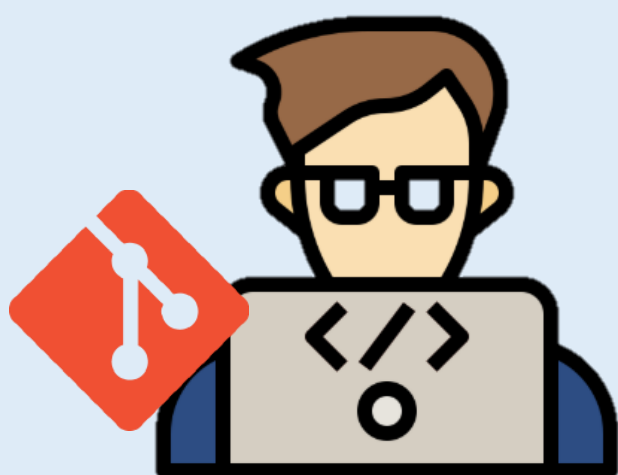

CASE - 3

Update latest source
code from cloud
github to local system

C:\Desktop >

```
git pull
```

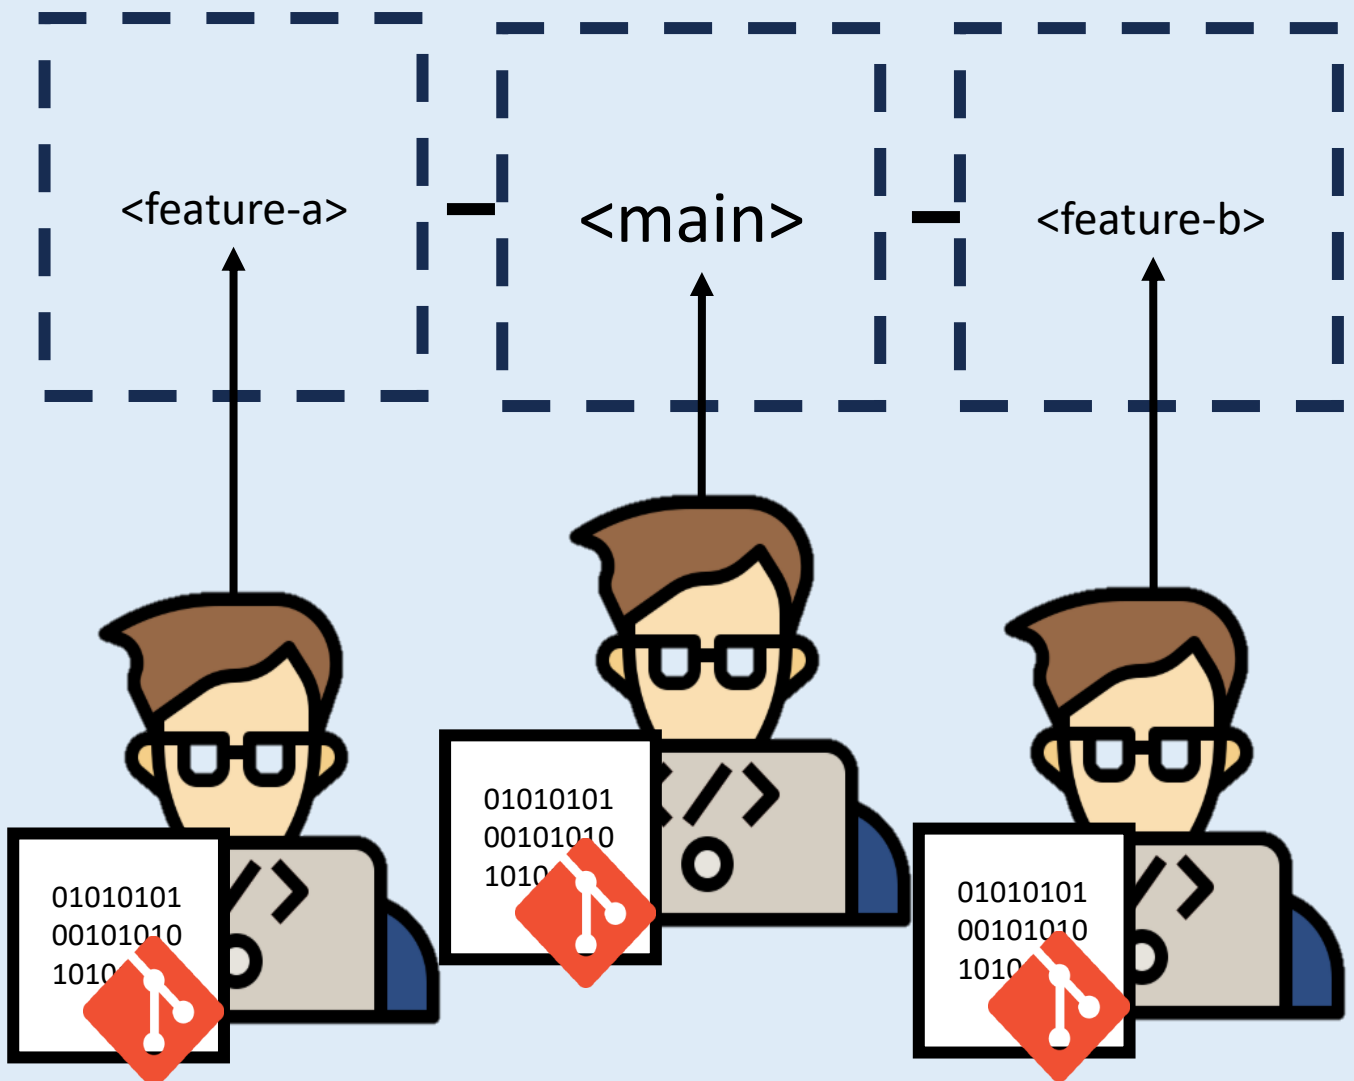

CASE - 4

Separate workspace without affecting the main project or your colleagues

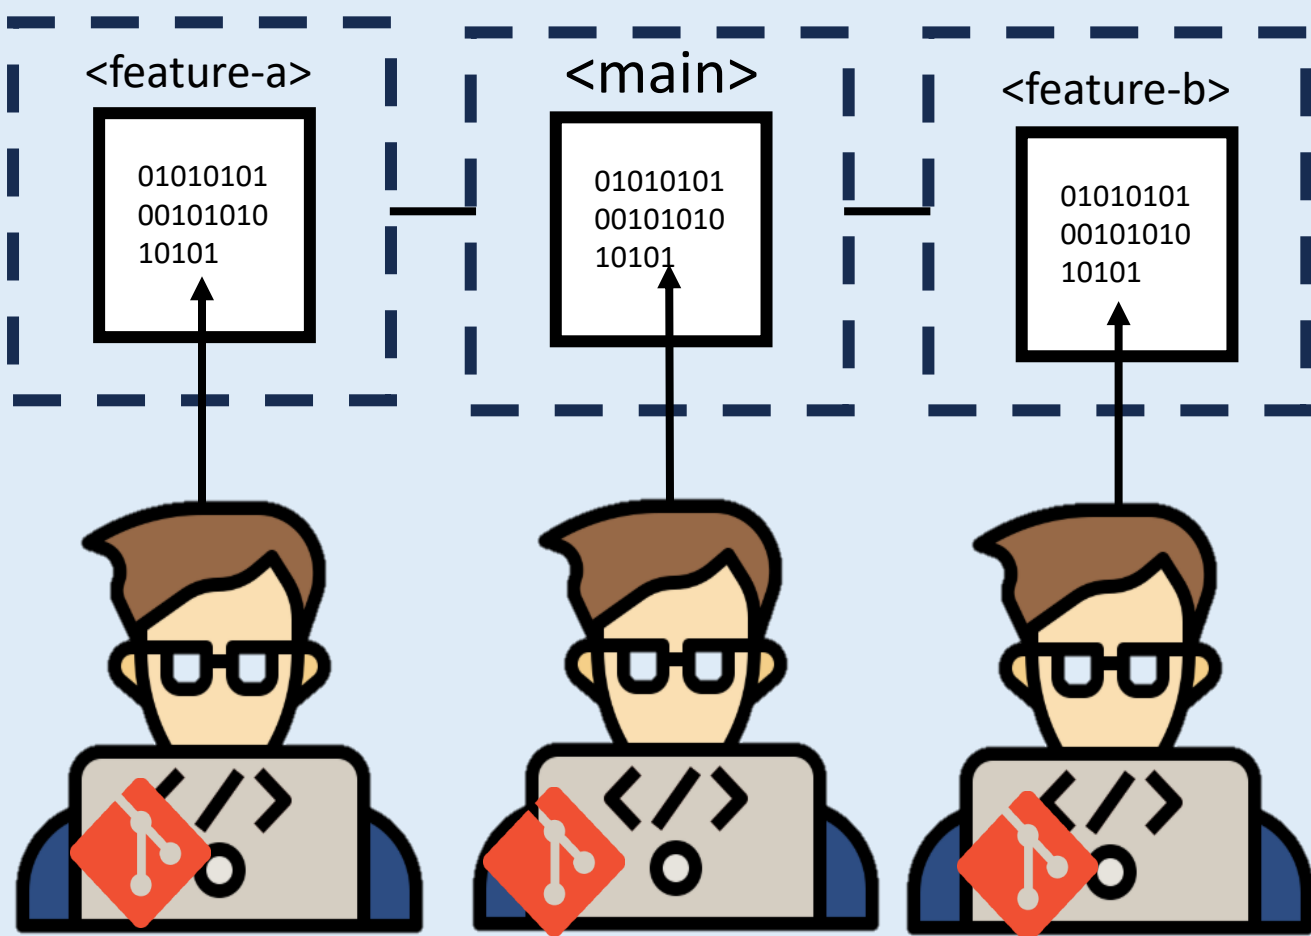

C:\Desktop >

```
git branch <feature>  
git switch <feature>
```

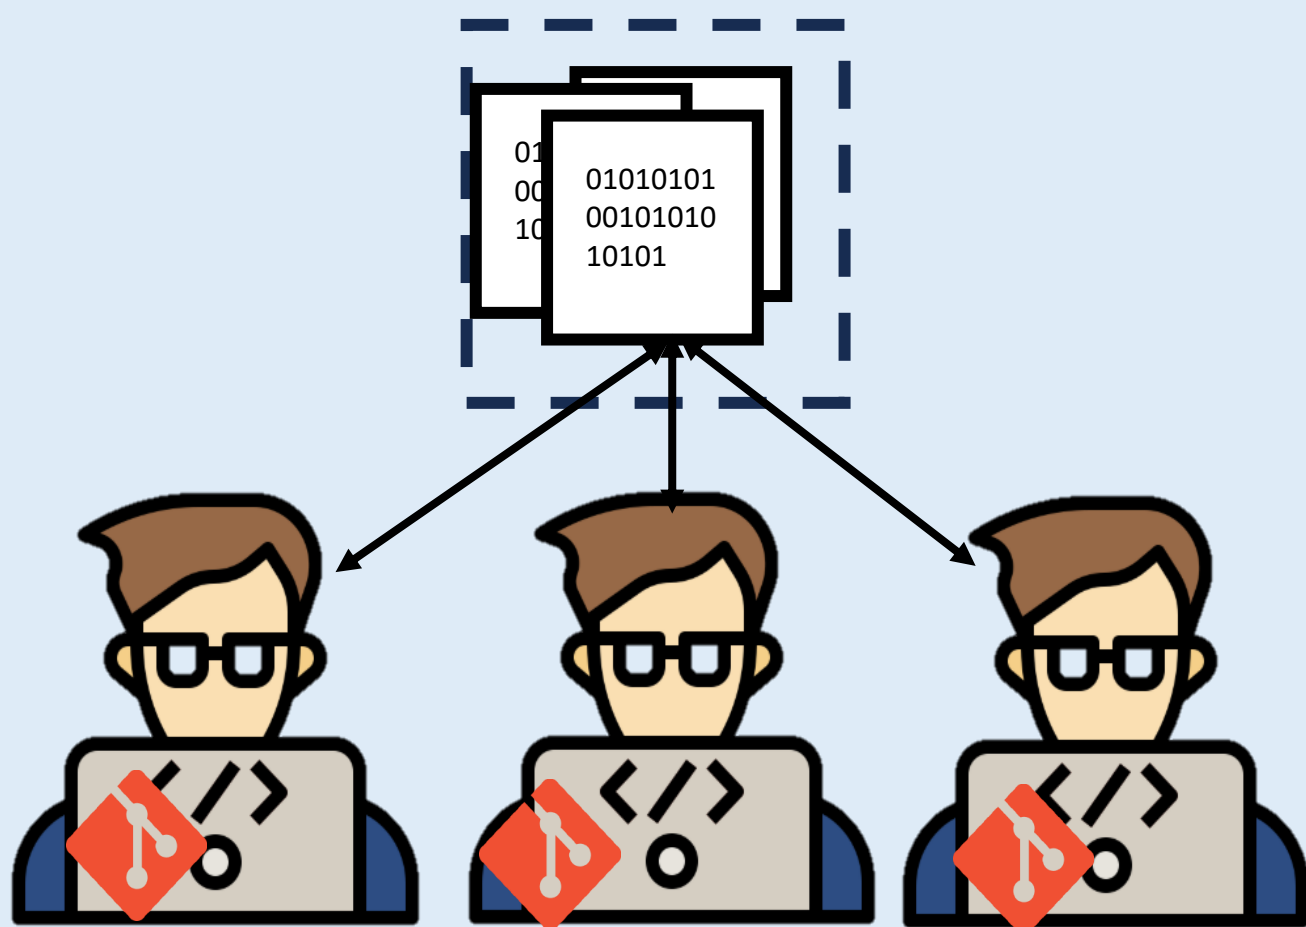

WITH GIT BRANCH & SWITCH

WITHOUT GIT BRANCH & SWITCH

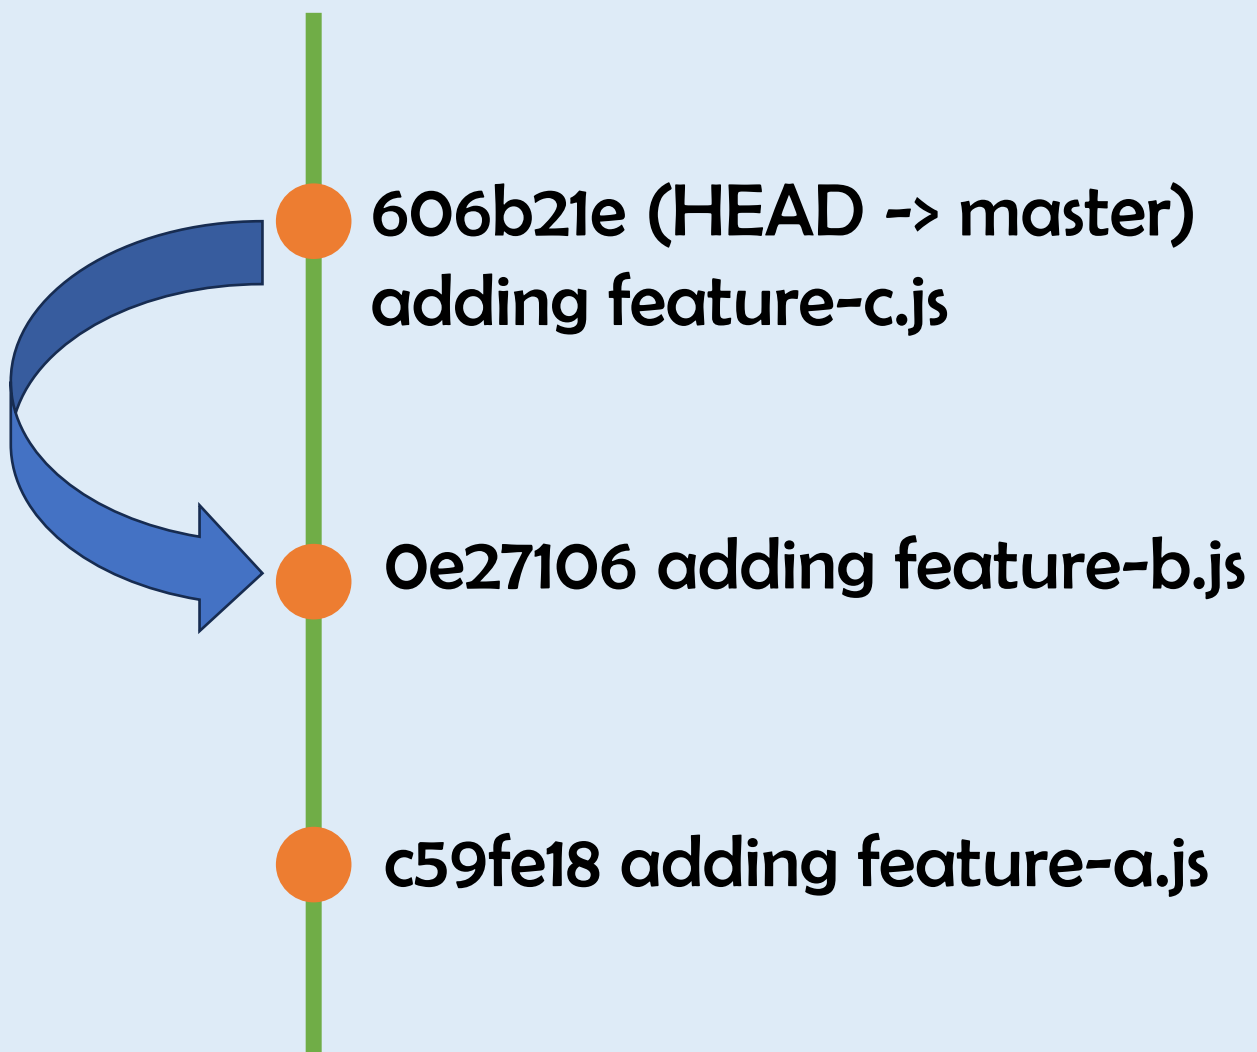

CASE - 5

Create a new branch named `<branch>` from commit `<7_digit_hash_commit>` and immediately switch to that branch.

C:\Desktop >

```
git switch -c feature-b 0e27106
```

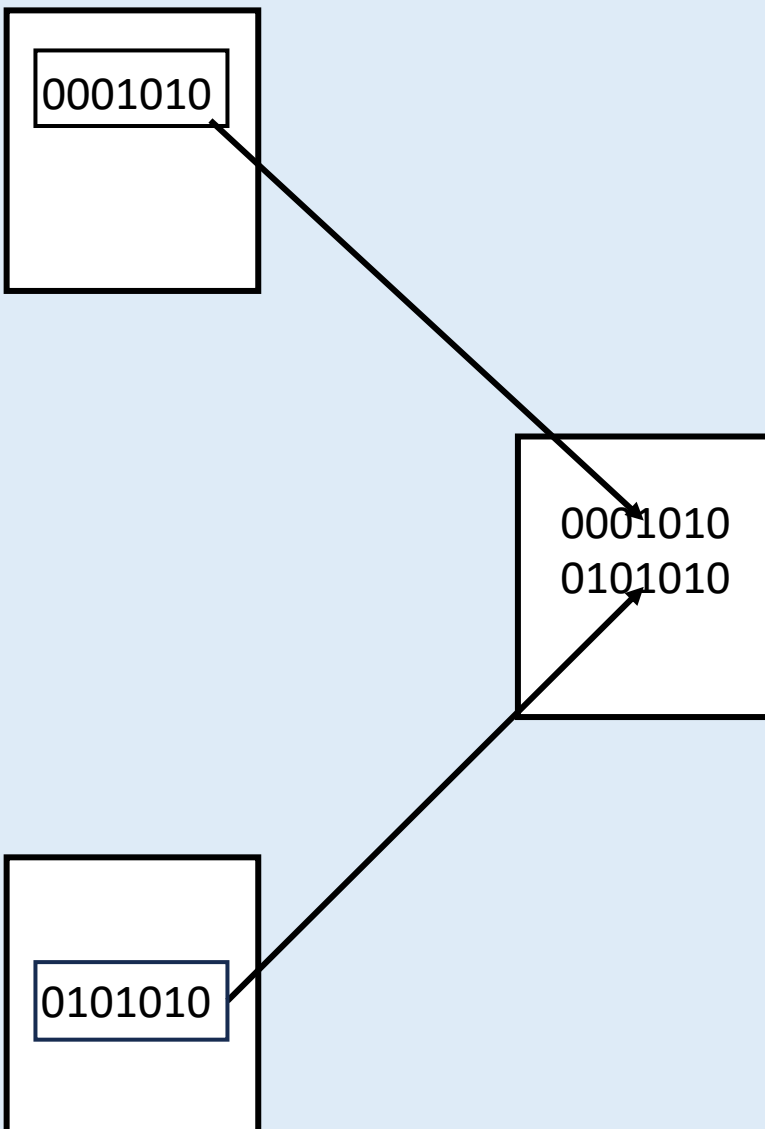

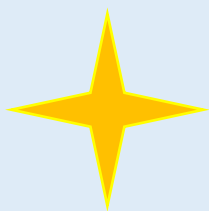

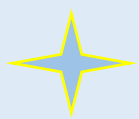

CASE -6

combining the changes from one branch into another

C:\Desktop >

```
git merge <branch>
```
